

CrossCube Chamber

Strong, Smart Access Chambers

The CrossCube Type 3 chamber is the smart solution for modern infrastructure. Lightweight, strong, and easy to install, it saves time and costs. Its modular design allows full customization, while impact-resistant recycled materials make CrossCube a sustainable, future-proof choice for demanding projects.

Why CrossCube is the Best Choice

- User-friendly modular chambers that are lightweight and easy to install.
- Powerful construction from strong, impact-resistant recycled materials.
- Cost-efficient design reduces transport and storage costs thanks to low weight and modularity.
- Customizable to project requirements with factory adjustments and on-site flexibility.
- Practical 3D design and BIM integration for streamlined planning.
- Sustainable solution made from recycled, fully recyclable materials.
- Versatile range of dimensions, knockout connections, and adjustable covers for many applications, including E900 load class.
- Perfect compatibility with Utilis Multichannel, for extra strength and flexibility for Cable networks

In Short

- Lightweight and modular
- Strong and impact-resistant
- Fully customizable
- Sustainable and recyclable
